EDUCATION

University of Minnesota Twin Cities

September 2024 – May 2028

B.S.: Data Science

Dean's List: **GPA: 3.93**

PROJECT EXPERIENCE

Data Scientist | *Agricultural Engineering Lab – University of Minnesota*

November 2024 – May 2025

- Currently engaged in the research project focusing on embedding Machine Learning experience for optimized training data sets of detecting leaves diseases.
- Built and upgraded Gopher Eye mobile application to optimize custom convenience, leaves' data gathering and storage process using Dart, Flutter and Optimization Techniques.
- Implemented Google Maps API for real-time geospatial tracking of agricultural field data to help minimize time and improve process efficiency of the rest of the lab sections.
- Explored biweekly team meetings, presenting the work progress and revealing error occurrence.

Full Stack Developer | *Independent Project*

August 2025 – November 2025 (*in progress*)

- Designed and developed the backend of an interactive portfolio website using Python and Django, implementing database models, server-side logic to manage both professional and extracurricular content.
- Built the frontend with HTML and CSS, delivering a responsive and engaging user interface.
- Created the design in Photoshop, ensuring a clean, intuitive layout and seamless navigation experience.
- Integrated a dedicated section to showcase personal photography work, highlighting creative growth and progress over time.

ADDITIONAL TRAINING

Machine Learning Specialization | *Coursera – Stanford University*

June 2025 – August 2025

- Explored Supervised Learning, decision tree learning pros and cons, neural networks training, and model evaluation via course materials.
- Learned about Unsupervised Learning techniques, regularization and optimization effect, clustering algorithm, error analysis, Gradient Descent, XGBoost algorithms, mostly working with regression models.
- Observed and applied hands-on experience applying ML algorithms to real-world problems using Python, NumPy, Tensorflow, Jupyter Notebook.

Internship | *Higher School of Economics*

May 2023 – June 2023

- Explored C++ programming, doubled coding speed, and gained proficiency in Python and JavaScript.
- Ranked in the top 5 in CodeForces virtual competitions among 30+ elite participants, excelling in algorithmic problem-solving and analytical thinking.
- Implemented efficient OOP algorithms in C++ and Python, with strong skills in designing and solving complex algorithmic challenges.

AI-LEAF Undergraduate Scholars Program | *University of Minnesota*

September 2025 – May 2026 (*in progress*)

- Selected for a competitive, year-long program exploring the intersection of AI, climate-smart agriculture, and forestry.
- Participating in weekly seminars on AI & data science, remote sensing, agriculture/forestry, and leadership/ethics.
- Collaborating on fact sheets that translate research insights for policymakers and industry leaders.

SKILLS

Programming Languages: *Python, C++, Html, LISP, JavaScript, Dart, Pascal, Java*

Operation Systems: *macOS, Windows*

Software Tools: *Jupyter Notebook, Microsoft Office, Scikit-learn, Google Colab, Tensorflow*

Programming Environments: *Visual Studio Code, Xcode, PyCharm, MySQL Workbench, MATLAB, pgAdmin*

Other Environments: *Adobe Photoshop, Adobe Illustrator, Adobe Lightroom*
